Abstract of **JP2001302463**

PROBLEM TO BE SOLVED: To provide a hair-treating agent which has an excellent hair-repairing property, an excellent combine property for protecting hair, and an excellent antistatic effect, can be produced by a simple production method, has excellent stability, an excellent viscosity-expressing property, excellent safety, and an appearance different from other preparations. SOLUTION: This hair-treating agent characterized by containing 0.1 to 10.0 wt.% of cationized guar gum and ≥ 2.0 wt.% of a protein hydrolyzate and/or a protein hydrolyzate derivative. It was found that the hair-treating agent repairs the damage to hair, gives gloss and flexibility to the hair, improves a humectant property, and improves a hair-combing property. A production method for obtaining a proper viscosity from the aspect of usability is simple, and the expression of the viscosity is stable. The appearance is transparent.
